CHAPTER V
CONCLUSION AND SUGGESTION

In this chapter, the researcher describes the summary of the previous studies in detail in relation to the research objectives. It also shows the findings drawn from the research summary. In addition, recommendations that can help improve English learning in class X OTKP. Therefore, after the researcher conducted the research, it can be concluded and recommended as follows:

1.1 Conclusion

The results of the study found that the experience gained by students was used for further learning purposes, it can be concluded that students in class X OTKP by English learning using e-learning media get a lot of new experiences where the challenges they face, then synchronous or asynchronous learning and how to solve problems they face. This is evidenced by the qualifications of each dimension of the questionnaire which shows that students get to experience new challenges during learning using e-learning media. In addition, students believe that the use of e-learning media in learning English is very much an obstacle in learning. During the COVID-19 outbreak that occurred yesterday, online-based learning became popular in teaching and learning activities. Learning to use e-learning media students have difficulty learning online and it does not help them in understanding English learning properly and correctly. In addition, students are affected because they cannot socialize directly with their classmates because they had to study online several years ago.

This study also revealed that the students of class X OTKP who English learning using e-learning media have difficulty. Difficulties experienced by students such as understanding where they are when learning English using e-learning media are unable to understand the explanations given by the teacher and they also experience several obstacles including poor signals and wasteful quotas, as well as errors on mobile devices. used when learning English using e-learning media.

1.2 Suggetion

Based on the research findings, the researcher recommends the writer's suggestions are:

1. Teacher

It is recommended for teachers to prepare themselves to teach in the digital era. They are also advised to improve their knowledge and skills in operating electronic technology because they are prospective teachers in the digital era. New normal brings teachers to new ways of teaching. It is recommended for teachers to provide a teaching and learning process with fun media, so that students will easily understand the teacher's explanations.

2. Student

Through electronic media, students can study independently which helps them access various applications that can be used in learning English. Of course it also has an impact on the social life of students. During the Covid 19 period, students were very limited in socializing with other students. And for good reason, continuing to look at the phone screen for long periods of time can cause eye problems, but if used normally it's fine. An unstable connection causes online learning through e-learning media to be disrupted.

3. For other researchers

In addition, further researchers are also advised to conduct and develop this research by expanding the research problem and participants for those who are interested in conducting research on students' experiences in learning English using e-Learning media.
