

CHAPTER V CONCLUSION AND SUGGESTION

The last chapter of this research consists of the conclusion, and suggestions of the study. The first part of this study is time to give concluding remarks on the present research about students' experiences in learning speaking by applying WhatsApp voice notes. The second part of this chapter presents suggestions for the next researcher.

5.1 Conclusion

6.1.1 Students' Attitudes Toward Learning Speaking by Applying WhatsApp Voice Notes During Emergency Remote Teaching

The study found that WhatsApp voice notes were used as an alternative medium for learning and practicing speaking during emergency remote teaching, it can be concluded that the 11th-grade students of MA Daruth Thalibin are familiar with and understand the features available on WhatsApp. This is evidenced by the qualifications of each dimension of the questionnaire which shows that students give a positive attitude and state that WhatsApp voice notes are easy to use in learning speaking. In addition, students also stated that the interaction on WhatsApp voice notes as a media for learning speaking can improve performance and make them more confident. It also allows students to be easier and more active in speaking practice. students stated that after emergency remote teaching ended, they wanted to continue using WhatsApp voice notes as a variety of learning media.

6.1.2 Students' Experiences in Practicing Speaking English by Implementing WhatsApp Voice Notes During Online Teaching

The study also revealed that students were happy with using WhatsApp voice notes as an alternative media for learning speaking because it was easy and also cost-effective compared to other applications. students stated that before

learning they had to make preparations such as ensuring that the cellphone battery was in full condition, preparing a headset, having a quota, and looking for a quiet place with an easy signal. So, on the other hand, they also feel the lack of this learning media. The obstacle they found was the lack of an internet connection which made it difficult for them to download the material, they had to be more focused and thorough so that the material was not buried.

5.2 Suggestion

Based on the results of this study, researchers are considering some suggestions for teachers, students, and future researchers. The researchers' suggestions are as follows:

1. For the teacher

Teachers should be careful to choose methods and media for the teaching process based on the needs and conditions of students. So that students do not get bored and have difficulty in the learning process.

2. For the students

Students must always actively learn English in any situation, even during the Covid-19 pandemic yesterday, and not spend the internet quota on things that are not important.

3. For the other researcher

Besides, further research is also suggested to conduct and develop this study by expanding the research problems and the participants for those who are interested to conduct a study about Mobile Assisted Language Learning, especially of WhatsApp application.

4. Future Researcher

For the future researcher, they can conduct similar research in practicing speaking online with the different topics such: analyze the assessment, the feedback of online teaching practice in speaking class and many more. The future researcher could add the instrument to support their research such as do the observation.
